About PwC
Survey Methodology

Survey Scope

The IAB Internet Advertising Revenue Report is part of an ongoing IAB mission to provide an accurate barometer of Internet advertising growth.

To achieve differentiation from existing estimates and accomplish industry-wide acceptance, key aspects of the survey include:

- Obtaining historical data directly from companies generating internet (desktop and mobile) advertising revenues;
- Making the survey as inclusive as possible, encompassing all forms of internet advertising, including websites, consumer online services, ad networks and exchanges, mobile devices; and
- Ensuring and maintaining a confidential process, only releasing aggregate data.

Methodology

Throughout the reporting process, PwC:

- Compiles a database of industry participants selling internet advertising revenues.
- Conducts a quantitative mailing survey with leading industry players, including web publishers, ad networks, commercial online service providers, mobile providers, and other online media companies.
- Requests and compiles several specific data items, including monthly gross commissionable advertising revenue by industry category and transaction.
- Acquires supplemental data through the use of publicly disclosed information.
- Identifies non-participating companies and applies a conservative revenue estimate based on available public sources.
- Analyzes the findings, identifies and reports key trends.
Half year revenues totaled...

$27.48

HY 2015

HY 2016
Half year revenues totaled $32.7 billion in 2016.
