INTRODUCTION

Over the past few years, user consumption patterns have undergone significant transformation. People have moved away from desktops and have embraced the ease and convenience of mobile devices.

In 2018, mobile ad spending in the US is estimated to reach $70 billion, a 200x increase since 2008 alone! By 2021, this figure is slated to touch $102 billion, a 46% increase over 2018. All in all, by 2021, advertisers and marketers in the US will be allocating approx. 40% of their total media budgets to mobile advertising.

As a result, video consumption on various mobile devices has seen an exponential rise, especially on smartphones. Just five years ago, adults in the US spent twice the amount of digital media time on desktop compared to mobile devices. Today, this statistic has almost completely reversed with 1.5x more media time being spent on mobile devices than desktops.

This explosion of mobile video consumption has fueled major advancements in mobile video advertising. Today’s advertisers demand increased metrics to ensure unprecedented levels of transparency and efficiency in their campaigns. By embracing video that is custom-tailored for the mobile device and also the behavior of a mobile user, advertisers are now able to achieve superior performance that only video can deliver.
This report explores the popularity and performance of mobile video ads around the world and tailors insights specifically to the North American market. At InMobi, we analyzed data from our network for 2017 (January – December). By delving deeper into mobile video consumption patterns worldwide, we were able to glean useful insights for advertisers to leverage to satisfy all types of marketing goals such as:

1. Driving awareness
2. Maximizing traffic to landing page
3. Interactions with a video ad
4. Media performance such as completion rates and Viewability metrics
METRICS THAT MATTER – MOBILE VIDEO ADS

**CLICK-THROUGH-RATE**

\[
\text{CTR} = \frac{\text{Number of Clicks}}{\text{Number of Impressions delivered}}
\]

**INDEXED VIDEO CTR**

\[
\text{INDEXED CTR} = \frac{\text{Specific Video CTR}}{\text{Global Average Video CTR}}
\]

**CONVERSION PER MILE**

\[
\text{CVM} = \frac{\text{(Number of App Installs)}}{\text{(Number of Impressions delivered)}} \times 1000
\]

**VIDEO PLAY RATE**

\[
\text{VPR} = \frac{\text{Number of Video plays}}{\text{Number of Impressions delivered}}
\]

**VIDEO COMPLETION RATE**

\[
\text{VCR} = \frac{\text{Number of Video Ads Completed}}{\text{Number of Video Ads Played}}
\]

**INVALID TRAFFIC RATE**

\[
\text{IVT Rate} = \frac{\text{Impressions delivered to non-human end point}}{\text{Total unfiltered impressions}}
\]
**KEY VIDEO INSIGHTS FOR USA**

1. **USA leads with 50% share of video spends and consumption; demand for video grows by 176%**
   The share of time spent inside mobile apps is growing, so is the video viewing time inside apps. As the number of digital video viewers increase by 10% between 2016 – 2020 to 235.9 million, North America and USA in particular will continue to enjoy rising investments in mobile video advertising to capitalize on the growing demand. In 2017 alone, spends on mobile video ads grew by 150% in the US as video viewing grew by 176% on the InMobi network.

2. **94% video viewability rate delivered to US advertisers**
   Brand advertisers across countries can track and measure Viewability around the world to ensure minimal wastage of the budgets. USA ranks #7 with 94% video ad viewability rate as reported by the MOAT dashboard. With a 0.2% invalid traffic rate, brand advertisers can be rest assured that their investment is reaping them high returns.

3. **America runs on programmatic**
   91% of all brand advertiser spends in 2017 occurred on programmatic channels, thanks to its superior efficiency and transparency. Unbelievably, spends on programmatic grew by 136% Y-o-Y in the US, further bolstering the pivotal role of programmatic buying.

4. **SDK-level integration delivers better CTRs and assists with Viewability measurement**
   Brand campaigns that ran on SDK-level integrated inventory, enjoy pre-cached videos which enable faster loading creating a highly enjoyable experience for users, delivering >10X higher CTRs compared to the performance of API integrated advertisers. Additionally, it gives advertisers access to Viewability dashboards offering transparency in reporting.

5. **Retail, mCommerce and F&B advertisers spend heavily on mobile video**
   The power of sight, sound and motion plays a big role in influencing consumers of their buying decisions. While a picture is worth a thousand words, in today’s world, a video is worth a thousand pictures. Hence it comes as no surprise that advertisers across industry verticals are spending on mobile video to stay top of the consumer’s mind.
THE GROWING MOBILE VIDEO ADVERTISING ECONOMY OF USA
VIDEO AD SPENDS EXPLODE:

150% GROWTH IN BRAND ADVERTISER SPENDS ON VIDEO ADS IN USA

- In 2018, brand advertisers are estimated to spend $7 billion, a 2000x increase since 2008 alone!
- By 2021, this figure is slated to touch $10.8 billion, a 50% increase over 2018.

- All in all, by 2021, advertisers and marketers in the US will be allocating approx. 11% of their total mobile advertising to video, up from 1% in 2008.

- To capitalize on this burgeoning set of digital viewers, brand advertisers in the US have increased their mobile video ad spends to stay ahead of the consumer demand for video.

REAPING THE REWARDS WITH MOBILE VIDEO ADVERTISING
Video Ads drive higher user engagement

- Video ads are the most valuable channel at the available to advertisers today.
- It not only allows for superior storytelling but the interactivity of video ads ensures a higher user engagement delivering above average CTRs compared to Banner Ads.

**2x CTR**
- Native: 42
- Video Ads: 100

**3x CTR**
- Banner Ads: 31
- Video Ads: 100

**3x CTR**
- Interstitial: 40
- Video Ads: 100

Engagement, as measured by CTR. Video Indexed CTR = (CTR/Global Average Video CTR)*100. The Global average CTR Index = 100. Based on 2017 data from the InMobi network.
ADVERTISERS ENJOY HIGHER RETURNS WITH SDK-LEVEL INTEGRATION

- A native in-app mobile video is a mobile-first video ad format that leverages the native video player of the device to deliver video ads. Such a format runs on SDK inventory where video ads are pre-cached hence reducing video ad-load speeds. Hence it creates a buffer-free user experience, while boasting of higher user engagement and completion rates for brand advertisers. Moreover, with an SDK integration, there is zero chance of fraudulent reporting.

- Advertisers are able to deliver a superior user experience thus attracting 70% higher CTRs when using SDK integrated inventory compared to API-integrated ones.

Indexed Video CTR for Brand Advertisers across Integration Types

Share of Advertiser Spend

- Engagement measured as CTR. Indexed CTR = (CTR/Global Average Video CTR) * 100. Global Average Video CTR Index = 100
- Integration types can be – SDK, API and Native in-app video.
- Based on 2017 data from the InMobi network
USA VIEWABILITY METRICS

• The arrival of MRC’s Viewability Guidelines* provided a single globally accepted definition for mobile video Viewability. As Viewability of ad impressions takes center stage, brand advertisers must demand MRC-compliant metrics for their ad campaigns. Third party verification measurement partners such as MOAT are incorporated directly into InMobi’s SDK resulting in cleaner metrics and the option to optimize the campaign on Viewability metrics.

• InMobi’s DMVR approach delivers 2x better than the MOAT Viewability benchmark for November 2017.

• Additionally, only 0.2% of the traffic is invalid against the MOAT benchmark of 0.3%, thus delivering superior efficiency for advertising dollars spent.
