MEASURING THE DIGITAL ECONOMY:
How the Internet Is Powering Economic Growth in the U.S. & Maine

ME

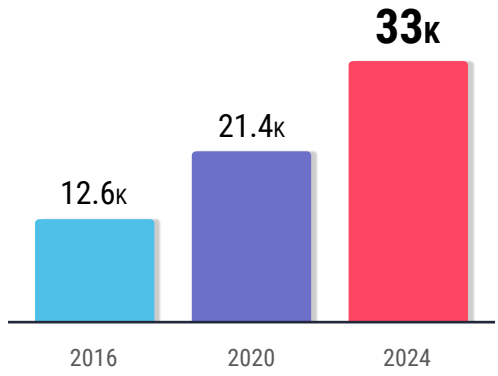
Measuring the Digital Economy: Advertising, Content, Commerce, and Innovation, led by Harvard Business School Professor Emeritus John Deighton, explores the internet's expanding impact on the U.S. economy. The 2025 edition of IAB's quadrennial study finds the digital economy now drives $4.9 trillion of economic value — 18% of U.S. GDP — and supports 28.4 million jobs. Additionally, 70% of recent job growth comes from independent creators, e-commerce entrepreneurs, platform workers, and large integrated tech companies. The data below highlights how the digital economy drives growth and job creation nationally and in Maine.

The Digital Economy's Impact on Maine

33K
Maine's total internet-dependent jobs in 2024

MAINE'S TOTAL INTERNET-DEPENDENT JOBS

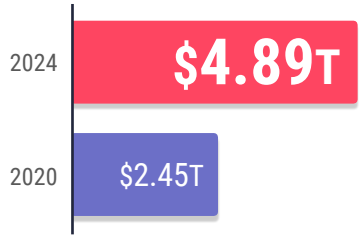
↑ 54% Growth since 2020



$14.6B
Maine's 2024 internet jobs' contribution to national digital economy

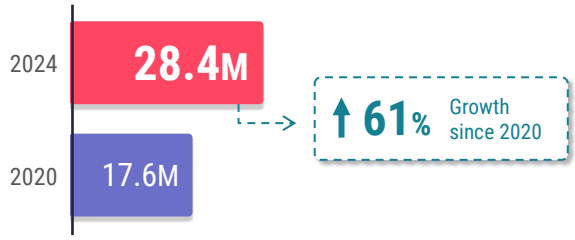
The Digital Economy is the Leading Driver of U.S. GDP Growth

VALUE OF THE DIGITAL ECONOMY

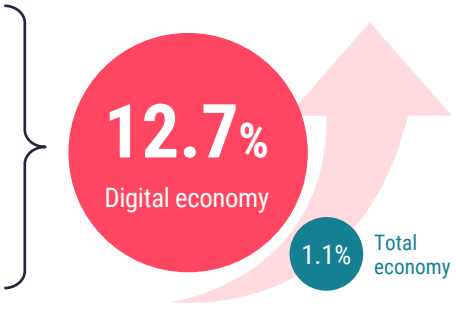


18%
Digital economy's share of total U.S. GDP in 2024

U.S. INTERNET-DEPENDENT JOBS



ANNUAL JOB GROWTH RATE SINCE 2020
12x



1.5M
